

We are a very successful software and consulting company based in Liechtenstein. Thanks to the STAGILE® method we developed, we are one of the leading providers of agile technologies in product and organisation development to consequently help companies as part of digital transformation. The ALEAS software team supports our methods with in-house developments and customer-specific web applications. Our partners include renowned national and international companies. In an effort to meet the vast demand for our software solutions we are seeking a

Software developer for web applications

Activities:

- Developing customer-specific web applications and software tools
- Analysing customer demands
- Supporting and developing productively used customer applications

Requirements:

- Experience in application programming (C#, HTML5, JavaScript, CSS, etc.)
- MS SQL Server, MS Visual Studio, database expertise
- Very good English skills

Personally you must be creative, proactive, flexible, willing to put in the effort, open-minded and enjoy working as part of a team.

We offer:

- Varied, exciting projects with renowned customers
- Companies with an ample range of activities, varied tasks, flat hierarchies and opportunities to take part in decision-making
- Leading, cutting-edge, agile methods and software tools
- Cool professional atmosphere, great team

We are looking forward to receiving your application!
